CIM

Your automated merging of PDF attachments has never been easier

Imagine receiving PDF / Word/ Excel or a combination of those as attachments in your mailbox? What if you could automatically combine all those documents into one PDF file? What is this option was availlable for every mailbox?

- The CIM Outlook merge app is geintegrated in your Office 365 Tenant
- The maximun of safety is garanteed by the Microsoft Office 365 login credentials

Incorporating the feature into your workflow, you can seamlessly blend PDFs, JPGs, JPEGs, Word, and Excel files into one comprehensive PDF document. This integration ensures that your document storage system becomes a treasure trove of information, neatly organized and easily accessible.

Merging Invoices: As you process invoices, this method not only simplifies your workflow but also creates an optimal structure for information, streamlining the subsequent steps of invoice processing. This elegant solution transforms document processing from a task into an art, ensuring efficiency and clarity at every turn.
